

IMPACT ON REDUCTION OF NHS PRESSURES AND COSTS

Rethinking Pain is a community-based pain service delivering chronic pain support across Bradford District and Craven.

The figures below demonstrate differences before receiving support from the Rethinking Pain Service (2022-23) and after being in the service for 9-12 months (2023-24) for a sample of 937 people. The figures also demonstrate improvements compared to the general Bradford population.

- GENERAL POPULATION BRADFORD & CRAVEN (B&CP)
- PEOPLE ACCESSING RETHINKING PAIN SERVICE (RP)

Reduction in GP Appointments

Saving the NHS:
£82,222

Reduction in A&E Attendances

Saving the NHS:
£27,195

Reduction in Outpatient Appointments

The saving to the NHS becomes apparent when the numbers of appointments booked by the general Bradford population are examined: +6%

Impact on Outpatient Appointments

Saving the NHS:
£58,514

Change in Mental Health Support Contacts

Saving the NHS:
£28,196

Total Annual Savings to the NHS:

£196,127

Based on 937 patients against 5 measures

1 coin = £10,000 SAVING

This data examines a sample of people in service in 2023/2024 against 5 key measurables, and indicates the potential for greater and more significant NHS savings when including data from all Rethinking Pain performance metrics.

Future Savings to the NHS

From this data, you could project that if the cohort were followed for 5 years, potential savings to the NHS could be

£980,635

Based on the results of 937 patients against 5 measures
